

AURORA BARIATRIC CLINIC REFERRAL

LABEL HERE

Our multidisciplinary team is comprised of physicians, dietitians, nurses, behavioural therapists and other visiting health professionals who understand the needs of bariatric patients. Our team works together to provide a comprehensive service to overweight and obese patients and to ensure that all aspects of health involved in the accumulation of excess weight are addressed. We achieve this, in part, by using the Canadian Practice Guidelines on the Management and Prevention of Obesity.
